Contents

Number 1

Editorial 1

The visual stimulus for saccadic eye movements in human observers 7
John M Findlay

Depicted angle of forms and perception of line drawings 23
Dale W Kaess, Jan B Deregowski

Evidence for the role of attentive fields in masking 31
Alexander W Pressey, Alexander E Wilson, Dan W Harper

The oblique effect of stimulus identification considered with respect to two classes of oblique effects 37
Edward A Essock

Perception of relative velocity: a revision of the hypothesis of relational determination 47
William Epstein, William J Cody

Colour and brightness preferences in the lizard *Anolis carolinensis* 61
P E Hodgkinson, A W Still

The computation of binocular edges 69
John E W Mayhew, John P Frisby

Brunelleschi's perspectives reconsidered 87
John A Lynes

Autokinesis and sight of the body 101
Martin Crawshaw, Graham Storrs, Brian Craske

Coloured illusory triangles due to assimilation 103
Colin Ware

Comment on: "Sensory conditions for the occurrence of the neon spreading illusion" 109
Theodore E Parks

Reply to Parks 111
Harrie F J M van Tuijl, Charles M M de Weert

An early ambiguous sculpture? 113
Thomas Lorscheid, Klaus Hofmeister

The three faces of Edgar Rubin 115
Alan Costall

Obituary 117

Solution to competition crossword 118

Reviews 119

Number 2

Editorial 123

A computational study of a period of infant object-concept development 125
Slava Prazdny

Visual sensitivity to the shape and size of a moving object: implications for models of object perception 151
Kenneth I Beverley, David Regan

Spatiotemporal filtering and the interpolation effect in apparent motion 161
Michael J Morgan

Motion aftereffect: a global mechanism for the perception of rotation 175
Patrick Cavanagh, Olga Eizner Favreau

Vision, visibility, and perception in driving 183
Brian L Hills

Irrelevance of local position information in visual adaptation to random arrays of small geometric elements 217
David H Foster, Robert J Mason

What is suppressed during binocular rivalry? 223
Randolph Blake, David H Westendorf, Randall Overton

Perception at the blind spot and tilt aftereffect 233
Geoff Cumming, Hans Friend

Subjective figures: some unusual concomitant brightness effects 239
Theodore E Parks

Reviews 243

Exhibition 248

Number 3

Editorial 249

Perception of surface slant and edge labels from optical flow: a computational approach 253
William F Clocksin

The effects of spatial and temporal factors on the perception of stroboscopic rotation simulations 271
J Timothy Petersik

Slant underestimation: a model based on the size of the viewing aperture 285
John A Perrone

Quantitative studies of some dynamic visual effects 303
John L Barbur

Human vision favors centrifugal motion 317
Karlene Ball, Robert Sekuler

The microstructure of dual-task interaction. 4. Sleep deprivation and the control of attention 327
Shirley Fisher

An analysis of perceptual and cognitive factors in radiographic interpretation 339
Dennis P Carmody, Calvin F Nodine, Harold L Kundel

The selective impact of verbally communicated criteria in orientation judgements by young children 345
Brendan O McGonigle, Margaret Chalmers

Gross failure to utilise alignment cues in children's drawing of three-dimensional relationships 353
Norman Freeman, Claire Hayton

The subjective brightness of illusory figures: is stratification a factor? 361
Theodore E Parks

Review 365

Number 4

Editorial 367

Orientation-specific adaptation: effects of checkerboards on the detectability of gratings 369
Marc Green

The movement aftereffect and a distribution-shift model for coding the direction of visual movement 379
George Mather

The influence of visual pattern on perceived speed 393
Gordon G Denton

Perceived spatial frequency of flickering gratings: a local spatial distortion 403
Göte Nyman, Jyrki Rovamo

Neuronal circuits capable of generating visual cortex simple-cell stimulus preferences 411
Vernon G Dobson

An invariant for wheel-generated motions and the logic of its determination 435
Dennis R Proffitt, James E Cutting

Effect of peripheral visual field size upon visual search in children and adults 451
Naoyuki Osaka

The dominance of touch by vision: sometimes incomplete 457
Roderick P Power

Control stimuli in investigations of the acute-angled and obtuse-angled Müller-Lyer illusions 467
June Adam, Layna Bateman

Binocular moiré fringes and the vertical horopter 475
Christopher W Tyler

A new illusion and possible links with the Münsterberg and Fraser illusions of direction 479
Steve P Taylor, J Margaret Woodhouse

Margaret Thatcher: a new illusion 483
Peter Thompson

Reviews 485

Humour 488

Number 5

Editorial 489

Visual images observed following an enucleation 493
C Stewart Gillmor

The graph-paper effect: subjective stereoscopic patterns induced by moving gratings 503
Mark A Georgeson

Adaptation to a 'spatial-frequency doubled' stimulus 523
Peter Thompson, Brian J Murphy

Visual persistence as a function of spatial frequency and age 529
William Lovegrove, Margaret Heddle

A psychophysical study of apparent rarefaction 533
Sergio Cesare Masin

The effect of blurring on intersecting-line illusions 537
Geoffrey W Stuart, Ross H Day

Infant response to impending optical collision 549
Jane Dunkeld, Tom G R Bower

Comparing two objects for size after a comparison of one of the objects with other objects 555
Portia E File, Richard N Wilton

Effects of posthypnotic suggestion on perceived egocentric distance 561
Peter J MacCracken, Walter C Gogel, Gerald S Blum

Amblyopia cannot be explained by considering only detection thresholds 569
Robert Hess, Steven Jenkins

The binocular: monocular sensitivity ratio for movement detection varies with temporal frequency 577
David Rose

Spatial anisotropy in intramodal and cross-modal judgments of stimulus orientation: the stability of the oblique effect 581
Eugene C Lechelt, Angeline Verenka

The role of context in the perception of orientation by the rat 591
Barry T Jones, Ravi K Rana, Brendan O McGonigle

Perception of an illusory triangle with masked inducing figure 599
Angus R H Gellatly

Faces, vases, subjective contours, and the McCollough effect 603
Glenn E Meyer, Debra Phillips

Book reviews 607

Humour 610

Number 6

Editorial 613

The effect of similarity between line segments on the correspondence strength in apparent motion 617
Shimon Ullman

Figure embeddedness as a function of the orientation of embedding-field contours 627
Stuart Appelle

Relation of brightness to threshold for light-adapted and dark-adapted rods and cones: effects of retinal eccentricity and target size 633
Bruce Drum

The double-nail illusion: experiments on binocular vision with nails, needles, and pins 651
Jodi D Krol, Wim A van de Grind

Modifications of the classical notion of Panum's fusional area 671
Peter Burt, Bela Julesz

A dichoptic edge effect resulting from binocular contour dominance 683
Edwin Welpe, Werner von Seelen, Manfred Fahle

The perceived spatial frequency, contrast, and orientation of illusory gratings 695
Mark A Georgeson

Detection of elasticity by young infants as an invariant property of objects 713
Arlene S Walker, Cynthia J Owsley, Jane Megaw-Nyce, Eleanor J Gibson, Lorraine E Bahrick

The detection of auditory visual desynchrony 719
Norman F Dixon, Lydia Spitz

Letter to the editor 723

Reviews 725

Conferences and meetings 729
